NANOBRASS

General indications

- Recommendations for use: the wire can be used on all wire EDM machines
- High cutting speed thanks to the greater presence of zinc compared to standard alloy wires
- Improvement of the automatic threading capability thanks to its high straightness

Technical features:

- Alloy: Brass, Cu 60% Zn 40%
- Diameter tolerance: 0 / -0.002 mm
- Roundness: 0 / -0.002 mm
- Straightness: <40 / 1000mm
- Breaking load: 1000 N / mm²
- Conductivity: > 20% IACS

Compliance:

- We certify that the wire is checked and complies with the technical specifications and tolerances declared.
