

For Smooth Operations

The sky is the limit

for **ABNOX**
Clamping Technology

ABNOX[®]
Lubrication & Metering Solutions

Controlled pressures are a requirement for high-precision clamping

ABNOX - the efficient and elegant solution for clamping tools and face milling gutters

- Transmission of high torque with precise and exact centric tension.
- High clamping force without ancillary power.
- Secure and simple handling.
- Controlled and accurate operation.
- Easy and clean disconnection of valves.
- With pressure gauge for controlled clamping and precise pressure build-up for tool chucks.

Clamping Technology maximum leak-tightness – minimal space!

ABNOX Inlet and Release Valves for the installation of clamping systems and cutting tools

Development according to customer requirements

ABNOX engineering and customized solutions for modern Hydraulic Clamping Systems in the machine industry.

Our team of experienced and highly qualified engineers develop tailor-made products or systems.

For Smooth Operations

Lubrication Technology

Manual, electric and pneumatically activated lubricating and decanting equipment for delivering greases and oils.

Metering Technology

Metering valves, control elements, part-specific applications.

Grease Supply

Compressed air and electrical grease supply systems and pumps for supplying moderately to highly viscous lubricants.

Clamping Technology

High pressure one-hand and hand lever pumps, high pressure valves, pneumatic and electrical high pressure pumps, clamping systems.

Customised Solutions

Development according to customer requirements for metering and greasing systems, from equipment and machines to clamping and releasing of tools and work pieces.
