

For Smooth Operations

Professional
Lubrication from A to Z

Lubrication Equipment, Grease Pumps and Filler Pumps

ABNOX[®]

Lubrication & Metering Solutions

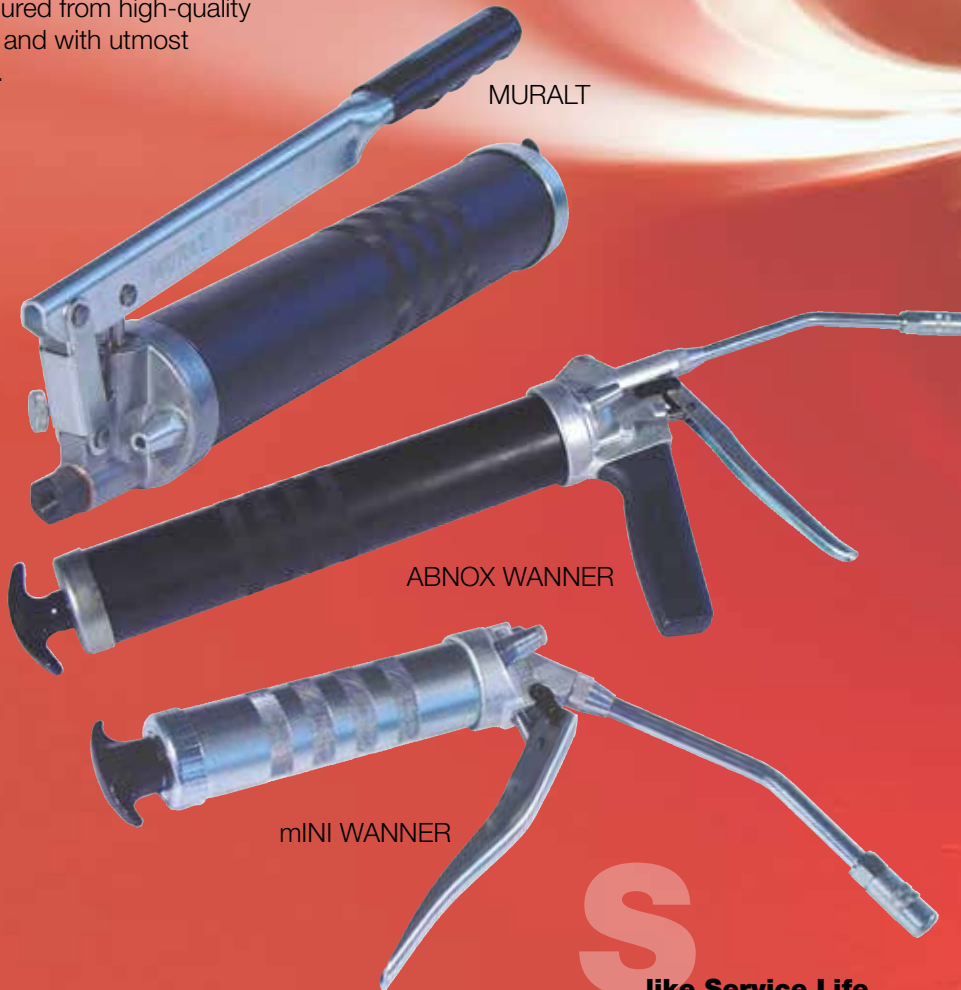

Professional Lubrication

The permanent and reliable function of any mechanical component can only be guaranteed by appropriate lubrication. For highest process reliability, ABNOX therefore offers a comprehensive range of professional hand lever, one-hand and hand push grease pumps for all fields of application.

Q like Quality

All lubrication equipment is manufactured from high-quality materials and with utmost precision.

C like Cost-Effectiveness

Exact metering guarantees that lubricants are applied with the highest possible efficiency.

S like Service Life

ABNOX grease pumps are designed for many years of permanent use without loss of efficiency.

F like Flexibility

All lubrication equipment can be filled up manually or by using filler pumps. The grease pumps MURALT and ABNOX WANNER are also suitable for the use of cartridges.

AX-400

C

like Comfort

Maximum comfort – that's what you will get from our electric hand pump, which is particularly appropriate for use at low temperatures and for the application of viscous lubricants (up to NLGI 3) without function restrictions.

Oil and Grease
Hand Push Pumps

E

like Ergonomics

Handiness and technically mature ergonomics allow for safe and fatigue-proof work.

**MADE IN
SWITZERLAND**

Greasing from Cylindrical Containers

Supply Guaranteed

Process reliability can only be guaranteed if the supply of lubricants is secured. For this reason, ABNOX offers a complete range of filler pumps, lubrication equipment and container hand-operated pumps.

Air-Operated
Lubrication
Equipment

AX-2000
Electric-
Operated
Lubrication
Equipment

M

like Modular System

Lubrication equipment and filler pumps are available for all customary containers from 14 to 180 kg.

Hand-Operated
Lubrication
Equipment
(only 14-18 kg)

Greasing from Conical Containers

E

like Easy Servicing

All lubrication equipment can easily be cleaned and maintained with a minimal downtime.

AX-2000

Operated
Lubrication
Equipment

L

like Low Noise

The electric-operated and air-operated lubrication equipment works with outstandingly low noise for safe operation without noise protection.

Operated
Filler Pump

Air-Operated
Filler Pump

H

like Handling

Quick fill-up of the lubrication equipment by short movements of the hand.

C

like Contamination

Hermetic filling-up protects against air inclusions and contamination in the lubricant.

Filling-Up from Conical Containers

Plike Precision

All lubrication equipment is manufactured in the proverbial Swiss quality with utmost precision.

Hand-Operated Filler Pump

Air-Operated Filler Pump

Rlike Reliability

High-grade materials and sophisticated construction designs guarantee absolute reliability.

For Smooth Operations

Lubrication Technology

Manual, electric and pneumatically activated lubricating and decanting equipment for delivering greases and oils.

Metering Technology

Metering valves, control elements, part-specific applications.

Grease Supply

Compressed air and electrical grease supply systems and pumps for supplying moderately to highly viscous lubricants.

Clamping Technology

High pressure one-hand and hand lever pumps, high pressure valves, pneumatic and electrical high pressure pumps, clamping systems.

Customised Solutions

Development according to customer requirements for metering and greasing systems, from equipment and machines to clamping and releasing of tools and work pieces.
